

Because you never stop getting better.

In the EIZO Academy you will find an extensive range of video tutorials, technical articles, seminars and workshops. Accompany us to the Lofoten Islands or through Namibia – in our two video series of the Colourclass series, our experts give you a comprehensive insight into color management and soft proofing. They also provide knowledge on numerous photographic topics. You will also find specialist articles with detailed monitor knowledge and interesting things about the EIZO Academy and the current dates of our seminars, workshops and webinars at: www.eizo.de/academy

Perfect workflow

As different as their creative requirements and areas of application are, they all have one thing in common: the desire for that guaranteed, an absolutely precise and unmanipulated view of the picture. In other words: you need a ColorEdge from EIZO.

To be able to use the entire color spectrum of modern cameras, you need a monitor that covers the widest possible color gamut. That's why the IPS panels of the ColorEdge monitor series have a particularly large color space. The 4K or 5K resolution also guarantees perfect detail representation when working with RAW data.

Each individual monitor panel is precisely measured over its entire surface in the factory. Any inhomogeneities in brightness and color casts are detected and removed. Additional colors are always also guaranteed.

ColorEdge with DUE

Other monitors without DUE

Additional features CG series (selection)

16-bit 3D LUT for maximum color depth

Black Display

16-bit LUT and 10-bit mode

Monitor display in 10 bit

Even fine tonal value breaks in gradients or color casts in the grayscale are displayed in a differentiated and detailed manner.
